

ELECTRIC POWER RATINGS GUIDE

2023

Eighteenth Edition

CONTENTS

Cat® Diesel Generator Sets

50 Hz Ratings	4 – 6
50 Hz Ratings – Cat GC Global	7
50 Hz Ratings – Heavy Fuel	7
60 Hz Ratings	8 – 11
60 Hz Ratings – Cat GC Global	11 – 12
60 Hz Ratings – Cat GC North America	12 – 13
60 Hz Ratings – Heavy Fuel	13
50 & 60 Hz Ratings – Rental Power	13 – 14
Definitions	15

Cat Gas Generator Sets

50 Hz Ratings – Natural Gas	18 – 19
50 Hz Ratings – Biogas	19
60 Hz Ratings – Natural Gas	20 – 21
60 Hz Ratings – Power Solutions	21
60 Hz Ratings – Biogas	22
50 & 60 Hz Ratings – Rental Power	22
Definitions	23

Renewable Hybrid Energy Solutions

Photovoltaic Panels (PV)	26
PV Inverter Options CE Mark & UL Listed	27
Weather Stations	28
Microgrid Master Controllers (MMC)	29
Microgrids & Renewable Energy Systems	30
Power Grid Stabilization (PGS)	30
Energy Time Shift (ETS)	31
Energy Capacity Expansion (ECE)	31

EMCP 4	34 – 35
Product Features	36

Systems Products

Advanced Control	40 – 41
Paralleling Switchgear and Cat Switchgear Selector	42 – 43
ATS, ATC Line and TruONE & MX Line	44
Temporary Generator Connections	45

Cat Connect and Product Support	48 – 52

3516E 60 Hz

DIESEL GENERATOR SETS

DIESEL

50 Hz, 6.8 – 200 kVA RATINGS

kVA		Generator Set Model	Engine	Configuration
Standby	Prime			
Single Phase Output* 1500 rpm				
7.5	6.8	DE7.5E3S	C1.1	R96/EU Stage IIIA Equivalent
11	10	DE11E3S	C1.5	R96/EU Stage IIIA Equivalent
12	11	DE12E0S	C1.5	Low BSFC
14	13	DE14E3S	C2.2	R96/EU Stage IIIA Equivalent
16.5	15	DE16E3S	C2.2	R96/EU Stage IIIA Equivalent
26	24	DE26E0S	C3.3	Low BSFC
26	24	DE26E3S	C3.3	R96/EU Stage IIIA Equivalent
40	36	DE40E0S	C3.3	Low BSFC
40	36	DE40E2S	C3.3	R96/EU Stage II Equivalent
50	45	DE50E0S	C3.3	Low BSFC
55	50	DE55E3S	C4.4	R96/EU Stage IIIA
90	82	DE90E2S	C4.4	R96/EU Stage II Equivalent
90	82	DE90E3S	C4.4	R96/EU Stage IIIA
Three Phase Output** 1500 rpm				
9.5	8.5	DE9.5E3	C1.1	R96/EU Stage IIIA Equivalent
13.5	12.5	DE13.5E3	C1.5	R96/EU Stage IIIA Equivalent
16	14.5	DE16E0	C1.5	Low BSFC
18	16.5	DE18E3	C2.2	R96/EU Stage IIIA Equivalent
22	20	DE22E3	C2.2	R96/EU Stage IIIA Equivalent
33	30	DE33E0	C3.3	Low BSFC
33	30	DE33E3	C3.3	R96/EU Stage IIIA Equivalent
49	45	DE56AE0	C3.3	Low BSFC
50	45	DE50E0	C3.3	Low BSFC
50	45	DE50E2	C3.3	EU Stage II Equivalent
55	50	DE55E0	C3.3	Low BSFC
55	50	DE55E2	C4.4	EU Stage II Equivalent
65	60	DE65E0	C3.3	Low BSFC
65	60	DE65E3	C4.4	R96/EU Stage IIIA
88	80	DE88E0	C4.4	Low BSFC
65	60	DE75AE0	C3.3	Low BSFC
88	80	DE100AE0	C4.4	Low BSFC
88	80	DE88E3	C4.4	R96/EU Stage IIIA
110	100	DE125AE0	C4.4	Low BSFC
110	100	DE110E2	C4.4	EU Stage II Equivalent
110	100	DE110E3	C4.4	R96/EU Stage IIIA
149	135	DE169AE0	C7.1	Low BSFC
150	135	DE150E0	C7.1	Low BSFC
165	150	DE165E0	C7.1	Low BSFC
165	150	DE165E3	C7.1	R96/EU Stage IIIA Equivalent
175	160	DE175E3	C7.1	R96/EU Stage IIIA Equivalent
200	180	DE200E0	C7.1	Low BSFC

*All ratings at 1.0 pf. **All ratings at 0.8 pf.

DIESEL

50 Hz, 180 – 850 kVA RATINGS

kVA		Generator Set Model	Engine	Configuration

DIESEL

DEFINITIONS

Standby: Output available with varying load for the duration of the interruption of the normal source power. Average power output is 70% of the standby rated ekW. Typical operation is 200 hours per year, with maximum expected usage of 500 hours per year.

Mission Critical: Output available with varying load for the duration of the interruption of the normal source power. Average power output is 85% of the mission critical rated ekW. Typical peak demand up to 100% of rated ekW for up to 5% of the operating time. Typical operation is 200 hours per year, with maximum expected usage of 500 hours per year.

Prime: Output available with varying load for an unlimited time. Average power output is 70% of the prime rated ekW. Typical peak demand is 100% of prime rated ekW with 10% overload capability for emergency use for a maximum of 1 hour in 12. Overload operation cannot exceed 25 hours per year.

Prime-DCP: For data center applications only. Prime-DCP power output available with varying load for unlimited time. Average power output is not to exceed 100% of Prime-DCP rated ekW. Typical peak demand is 100% of the prime-DCP rated ekW with 10% overload capability for emergency use for a maximum of 1 hour in 12. Overload operation cannot exceed 25 hours per year.

Continuous: Output available with non-varying load for an unlimited time. Average power output is 70-100% of the continuous rated ekW. Typical peak demand is 100% of continuous rated ekW for 100% of the operating hours.

GAS

DEFINITIONS

Standby: Output available with varying load for the duration of an emergency outage. Average power output is 70% of the standby power rating. Typical operation is 200 hours per year, with maximum expected usage of 500 hours per year.

Demand Response: Output available with varying load for the duration of the interruption of normal source power. Average power output is 70% of the standby power rating. Typical operation is 200 hours per year, with maximum expected usage of 500 hours per year.

Prime: Output available with varying load for an unlimited time. Average power output is 70% of the prime power rating. Typical peak demand of 100% of prime-rated ekW with 10% of overload capability for emergency use for a maximum of 1 hour in 12. Overload operation cannot exceed 25 hours per year.

Continuous: Output available with non-varying load for an unlimited time. Average power output is 70-100% of the continuous power rating. Typical peak demand is 100% of continuous rated ekW for 100% of operating hours.

RENEWABLE HYBRID SOLUTIONS

Weather Stations

Weather Stations provide a pre-engineered system that cost-effectively scales to Microgrid Solution size and complexity. The Weather station delivers best-practice PV performance tracking and correlation technology.

Basic Features	Class A	Class B	Class C
Plane of Array	•	•	•
Back of Module Temperature	•	•	•

RENEWABLE HYBRID SOLUTIONS

Microgrid Master Controllers (MMC)

MMC-S

The MMC-S is designed for applications with a limited number of power generation assets. It integrates the photovoltaic (PV) system, generator set, and energy storage system. It provides basic controls functionality.

MMC-M

The MMC-M is designed for applications with a moderate number of power generation assets. It integrates with the photovoltaic (PV) system, generator set, and energy storage system. The MMC-M provides intermediate controls functionality.

MMC-Custom

The MMC-Custom is designed for applications with a high number of power generation assets. It integrates with the photovoltaic (PV) system, generator set, and energy storage system. The MMC-Custom provides advanced or specialized controls functionality.

RENEWABLE HYBRID SOLUTIONS

Microgrids & Renewable Energy Systems

Cat microgrids provide cost-effective power for on- and off-grid communities and commercial or industrial installations. By combining our advanced energy storage solutions with renewable energy from photovoltaic solar modules and traditional generation from utilities or generator sets, we can develop an energy system specifically designed for your needs. The Cat microgrid combines all sources into a single, controllable entity to optimize the flow of energy so it can be produced at the lowest total cost.

Power Grid Stabilization (PGS)

Power Grid Stabilization modules provide a pre-engineered solution to energy storage needs. The modules integrate with diesel or gas generator sets, photovoltaic (PV), or other renewable systems to provide short duration power. The module holds closely regulated system voltage and frequency during periods of rapid load addition or removal, or during periods of intermittent output from the renewables.

Model	Nameplate Energy	15 Minutes Output	5 Second Output
PGS840	448 kWh	840 kW	840 kW
PGS1260	672 kWh	1170 kW	1260 kW
PGS1260 HD mobile	672 kWh	1170 kW	1260 kW

RENEWABLE HYBRID SOLUTIONS

Energy Time Shift (ETS)

Energy Time Shift modules provide a pre-engineered solution to energy storage needs. The scalable system integrates with photovoltaic (PV) or other renewable systems to store energy from renewables, generator sets, or the grid for use at a later time. The ETS module contains the bi-directional power inverter with a fixed number of batteries and support equipment.

Model	Nameplate Energy	Continuous Output
ETS1500	1518 kWh	570 kW
ETS1500	1518 kWh	1000 kW*

*When paired with ECE below.

Energy Capacity Expansion (ECE)

The Energy Capacity Expansion modules provide increased energy capacity and discharge duration when connected for use with the ETS module.

Model	Energy
ECE1500	1518 kWh
ECE2000	2024 kWh
ECE2500	2530 kWh

EMCP 4

EMCP 4

EMCP 4.1

The EMCP 4.1 provides basic engine controls – stop/run/auto push button controls, cycle crank, and cool down timer. The 3.8 inch graphical display supports multiple languages, including character languages such as Chinese, Arabic, Russian, and Japanese. The EMCP 4.1 provides monitoring of generator electrical output, including AC voltage, current, frequency, and mechanical information such as oil pressure, coolant temperature, engine speed, and battery voltage along with fuel level if a sensor is provided. It also provides a number of protective functions, such as warnings and shutdowns for over/under voltage, over/under frequency, low oil pressure, high coolant temperature, low coolant level, failure to start, and overspeed.

EMCP 4.2

The EMCP 4.2 builds on the features of the EMCP 4.1 controller, offering expanded engine monitoring based on information available from the engine ECM, along with expanded generator set protection and monitoring, such as generator kW, kVA, and kWh.

Flexibility is also increased with the addition of a modbus RTU communication port, remote annunciator modules, and expansion I/O modules to allow the EMCP 4 system to be configured to meet site specific design requirements.

With the additional monitoring and expansion modules available, the EMCP 4.2 is designed to provide control and protection for critical installations, such as NFPA-110 Level 1 applications.

EMCP 4.2B

The EMCP 4.2B adds advanced features to the EMCP 4.2 controller, offering expanded generator set protection and monitoring, such as additional overcurrent protection curve selection, real (kW) load histogram, trip kWh and trip kVarh. Display screens are configurable for customer desired parameters.

An integrated basic programmable logic control (PLC) function to read controller inputs and drive controller outputs is also provided with the EMCP 4.2B.

EMCP 4

EMCP 4.3

The EMCP 4.3 further expands the EMCP 4 product line with the addition of 5.5 inch graphical display and additional context specific navigation keys.

With the addition of a Modbus TCP port, the EMCP 4.3 controller can be easily integrated into complex systems requiring complete generator set monitoring.

EMCP 4.4

The EMCP 4.4 builds on the EMCP 4.3 functionality with the addition of fully automatic multi generator set paralleling. The EMCP 4.4 provides all of the functions required to automatically parallel generator sets, including dead bus arbitration, automatic or manual modes of operation, and load sharing (real and reactive). Optional provisions allow for extended parallel operation of a single generator with Utility for Base Load/Import/Export capability.

Extended Service Coverage (ESC)

Since 2021, new EMCP replacements (i.e. from older EMCP to current versions) performed by Cat dealers are covered by ESC, see excerpt from ESC Contract.

Platinum Level Covered Components: All as-shipped consist from the factory with Caterpillar part numbers, including DOC (when DOC is not part of a DPF) are Covered Components with the exception of the following: DPF and SCR, filters, fluids, vee-belts, hoses, power take-offs, paint, batteries, and clutches. New replacement EMCP control panels with Cat part numbers installed on electric power generator sets by an authorized dealer are covered components.

Paralleling Switchgear

Cat standard switchgear products can support a wide variety of applications, or we can provide a custom Voltage designed system to meet your specific project needs. The XLM product supports transfer between the utility source and generator bus and allows for sustained parallel operation with the utility for load management applications. The EGP product supports paralleling on an

SYSTEMS PRODUCTS

Temporary Generator Connections

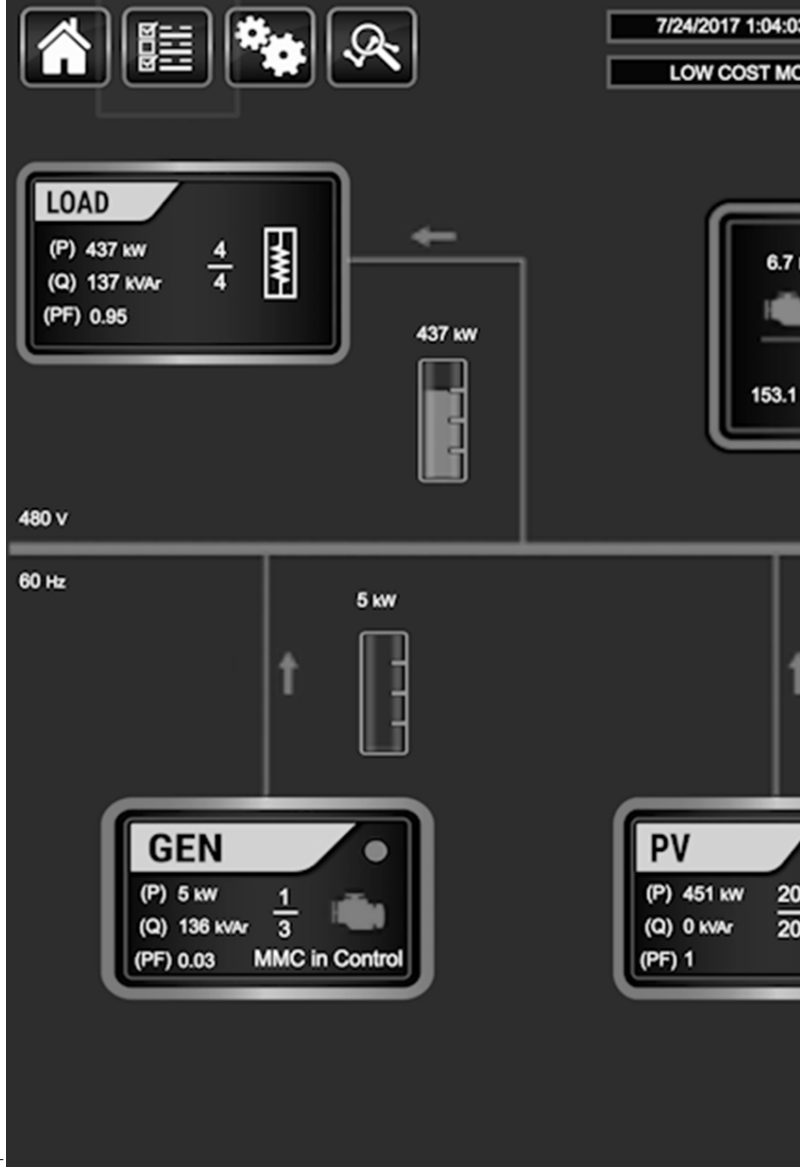

Features:

- UL508A
- Visual indication of L-L voltage (3 phase)
- Color Coded Cam-Locks
- Selectable Cam-Lock receptacle gender or mechanical lug connection to generator
- Available Phase Rotation, Loss and Undervoltage Protection
- Padlockable Wingnob latch
- Density rated (1000A/in²) bus
- Mechanically Interlocked access doors

Functions:

- Provides simple connection of temporary generator or load bank
- Provides for permanent lug or circuit breaker connection to building distribution equipment
- Weatherproof enclosures with temporary generator cable access doors

HIGH VOLTAGE

CAT CONNECT

Technologies and Services

Caterpillar's connectivity solution of Remote Asset Monitoring with Cat® Connect turns data into insights and insights into profits.

Customer Benefits:

- Monitor and manage your assets from any location on any device
- Decrease owning and operating costs
- Boost efficiency
- Increase uptime
- Improve safety
- Meet sustainability goals
- Reduce risk

Key Features:

- Customized alerts
- View your asset's: status, location, current faults, and engine & electrical parameters
- Manage maintenance
- Geofencing
- Remote start/stop
- Storm preparedness
- Condition monitoring (CVA connected customers)
- View, see and compare all your assets on one screen
- Fleet Performance enabled by reports & analytics

CAT CONNECT

Customers log into Cat Remote Asset Monitoring as the single portal to connectivity and digital services data. The following information is available via a direct connection to My.Cat.com:

- Inspections
- Scheduled oil sampling
- Operation and maintenance manuals
- Ordering parts
- Requesting service

PRODUCT SUPPORT

Product Support and Definitions

Extended Service Coverage (ESC)

Depending on the model and application, Silver, Gold, Platinum and Platinum Plus coverage levels are available from Caterpillar with terms to meet most applications, whether prime or standby.

Platinum and Platinum Plus provide additional allowances for overtime, emergency freight, rental, crane and rigging support. Please see the registration contract for details.

Equipment	Coverage Option
New Product	New ESC
Existing Product	Advantage ESC
Overhauls	OPC*

Platinum Plus goes beyond Platinum coverage to include Cat components installed by an authorized dealer. Such components must be approved. See your Cat dealer for details. Platinum Plus also offers more Additional Allowances and remote troubleshooting fees, up to a maximum of \$50.00 per claim.

Additional Allowances – Standby Power

	Travel/Mileage Limitations		Emergency Freight	Rental ⁵		Crane & Rigging ⁶	Overtime
Engine Displacement ⁴	Silver/Gold/Platinum hr / mile	Platinum Plus Only hr / mile	All Coverage Levels \$ USD	Platinum Only \$ USD	Platinum Plus only \$ USD	Platinum Only \$ USD	Platinum Plus only \$ USD
Up to 4 liters	2 / 100	10 / 500	500	2,500	5,000	1,000	3,000
Over 4 liters up to 7.5 liters	4 / 200	10 / 500	500	5,000	10,000	1,000	3,000
Over 7.5 liters up to 34 liters	8 / 320	10 / 500	500	20,000	20,000	5,000	3,000
Over 34 liters	8 / 320	10 / 500	500	40,000	40,000	12,500	3,000

⁴Please refer to the generator set spec sheets for particular displacement.

⁵Allowance is granted if covered failure repairs cannot be completed within 96 hours (for Platinum) or 48 hours (for Platinum Plus) of the authorized dealer technician's initial visit.

⁶Allowance is granted if covered failure repairs cannot be completed within 48 hours of the authorized dealer technician's initial visit.

PRODUCT SUPPORT

Additional Allowances – Prime Power

	Travel / Mileage Limitations		Emergency Freight Allowance	Overtime Allowance
Engine Displacement ⁴	Silver/Gold/Platinum hr / mile	Platinum Plus Only hr / mile	All Coverage Levels \$ USD	Platinum Plus only \$ USD
Up to 4 liters	2 / 100 or 161 km	10 / 500 or 805 km	500	3,000
Over 4 liters up to 7.5 liters	4 / 200 or 322 km	10 / 500 or 805 km	500	3,000
Over 7.5 liters up to 34 liters	8 / 320 or 515 km	10 / 500 or 805 km	500	3,000

⁴Please refer to the generator set spec sheets for particular displacement.

Electric Power ESC reimburses covered parts at customer list price, labor at selling rates and travel and mileage charges (less any deductibles) for covered repairs.

Available worldwide for all Cat Electric Power Products, ESC provides usual and customary parts and labor costs for covered system failures due to defects in materials and workmanship on components over the duration of the covered period.

This is a brief description of Extended Coverage. See your Cat dealer for more information. The Extended Coverage contract will govern.

*Overhaul Protection Coverage.

PRODUCT SUPPORT

Customer Value Agreements

WHAT IS A CUSTOMER VALUE AGREEMENT?

A CVA is any arrangement between you and your Cat dealer that helps you control your maintenance cost. Agreements are tailored to fit your business needs and can range from simple Preventive Maintenance Kits to sophisticated Total Maintenance & Repair contracts. No matter which option you choose, you can be assured that your Cat dealer will provide you with careful planning and ongoing attention that will help you succeed.

When you have a CVA with your Cat dealer, you have more time to do what you do best – run your business. Trained dealer technicians assist you by maintaining your equipment and driving down operating costs. In the end, everyone's goal is the same: helping you get more work done at a lower cost.

WHAT ARE THE BENEFITS OF A CUSTOMER VALUE AGREEMENT?

Agreement Flexibility – Adapt to level of support to meet your requirements.

All maintenance parts and tools – Cat maintenance parts/tools for routine services.

Accurate, professional testing – Caterpillar trained technicians have the specialist knowledge, technology, and global backup to check your equipment.

Early Warning – Advanced diagnostics to identify problems and schedule repairs before a failure.

Plan ahead with greater confidence – Improved reliability enables tighter scheduling of maintenance intervals.

Increased uptime – Engines run longer and more efficiently, improving profitability.

HOW DOES A CVA WORK?

A CVA is an individualized plan for all your equipment, regardless of age or application, with no pre-set requirements. Depending on your needs, your costs can be a flat monthly fee or based on production hours. Your agreement can cover one piece of equipment, systems, or entire fleets. Your Cat dealer will help you get more work done at a lower cost for your Cat and non-Cat equipment.

Long Term Service Agreements

WHAT IS A LONG TERM SERVICE AGREEMENT (LTSA)?

A Long Term Service Agreement has all the benefits of a traditional CVA, but is designed to support the customer for a minimum of 5 years. An LTSA is designed to support customers that know constant power is critical and need a reliable partner to help manage the total care of their equipment. With expertise and steady support, a Long Term Service Agreement helps the customer drive their business forward by controlling costs and minimizing risk.
